

Project Design Phase-II Technology Stack (Architecture & Stack)

Date	27 june 2026
Team ID	
Project Name	Darshan Ease
Maximum Marks	4 Marks

Technical Architecture:

The Deliverable shall include the architectural diagram as below and the information as per the table1 & table 2

Table-1 : Components & Technologies:

S.No	Component	Description	Technology
1	User Interface	Responsive web application for devotees, organizers, and administrators	HTML5, CSS3, JavaScript, React.js, Bootstrap
2	Application Logic-1	User authentication and authorization	Node.js, Express.js, JWT
3	Application Logic-2	Temple, slot, and booking management	Node.js, Express.js
4	Application Logic-3	Payment processing and booking confirmation	Razorpay API / Stripe API
5	Database	Stores users, temples, bookings, organizers, and admin data	MongoDB
6	Cloud Database	Database hosting (optional)	MongoDB Atlas
7	File Storage	Stores temple images and user profile images	Local Storage / Cloudinary
8	External API-1	Online payment processing	Razorpay API
9	External API-2	Email notifications for booking confirmation	Nodemailer (SMTP)
10	Machine Learning Model	Not Applicable	—
11	Infrastructure (Server / Cloud)	Local development and cloud deployment	Local Server, Render/Vercel, MongoDB Atlas

Table-2: Application Characteristics:

S.No	Characteristics	Description	Technology
1	Open-Source Frameworks	Frameworks used for frontend and backend development	React.js, Node.js, Express.js, Bootstrap
2	Security Implementations	Password encryption, authentication, authorization, secure APIs	JWT, bcrypt, HTTPS, CORS
3	Scalable Architecture	Three-tier architecture separating frontend, backend, and database	React.js + Node.js + MongoDB
4	Availability	Application available online with reliable cloud database	Render/Vercel, MongoDB Atlas
5	Performance	Fast API responses, optimized database queries, responsive UI	Express.js, MongoDB Indexing, React.js
