

**Project Design Phase-II**  
**Solution Requirements (Functional & Non-functional)**

|               |              |
|---------------|--------------|
| Date          | 27 june 2026 |
| Team ID       |              |
| Project Name  | Darshan Ease |
| Maximum Marks | 4 Marks      |

**Functional Requirements:**

Following are the functional requirements of the proposed solution.

| FR No. | Functional Requirement (Epic) | Sub Requirement (Story / Sub-Task) |
|--------|-------------------------------|------------------------------------|
| FR-1   | User Registration             | Registration through Form          |
|        |                               | Email Verification                 |
|        |                               | User Profile Creation              |
| FR-2   | User Authentication           | Login using Email and Password     |
|        |                               | Forgot Password                    |
|        |                               | Logout                             |
| FR-3   | Temple Management             | View Temple List                   |
|        |                               | Search Temples                     |
|        |                               | View Temple Details                |
| FR-4   | Darshan Slot Management       | View Available Darshan Slots       |
|        |                               | Select Date and Time Slot          |
|        |                               | Manage Slot Availability           |
| FR-5   | Ticket Booking                | Book Darshan Ticket                |

|       |                          |                               |
|-------|--------------------------|-------------------------------|
|       |                          | Generate Booking Confirmation |
|       |                          | Download E-Ticket             |
| FR-6  | Payment Management       | Secure Online Payment         |
|       |                          | Payment Confirmation          |
|       |                          | Donation Option               |
| FR-7  | Booking Management       | View Booking History          |
|       |                          | Cancel Booking                |
|       |                          | Booking Status Tracking       |
| FR-8  | Organizer Management     | Add Temple Details            |
|       |                          | Manage Darshan Slots          |
|       |                          | View Devotee Bookings         |
| FR-9  | Administrator Management | Manage Users                  |
|       |                          | Manage Organizers             |
|       |                          | Generate Reports              |
| FR-10 | Notifications            | Email Booking Confirmation    |
|       |                          | Booking Updates               |
|       |                          | Cancellation Notifications    |

## Non-functional Requirements:2522

Following are the non-functional requirements of the proposed solution.

| FR No. | Non-Functional Requirement | Description                                                                                                                                |
|--------|----------------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
| NFR-1  | <b>Usability</b>           | The application should have a simple, intuitive, and user-friendly interface for devotees, organizers, and administrators.                 |
| NFR-2  | <b>Security</b>            | User data, passwords, and payment information must be protected using secure authentication, authorization, and encryption techniques.     |
| NFR-3  | <b>Reliability</b>         | The system should provide accurate booking information and operate consistently with minimal downtime.                                     |
| NFR-4  | <b>Performance</b>         | The application should respond quickly, with page loading and booking transactions completed within a few seconds under normal conditions. |
| NFR-5  | <b>Availability</b>        | The system should be accessible 24×7 to allow devotees to book tickets at any time.                                                        |
| NFR-6  | <b>Scalability</b>         | The application should support increasing numbers of users, temples, and bookings without affecting performance.                           |
