Problem – Solution Fit Template:

Problem Phase

Temple devotees often face challenges such as long waiting queues, overcrowding, uncertainty about darshan slot availability, and time-consuming manual ticket booking. Temple authorities also struggle with managing bookings, maintaining records, and handling large numbers of devotees efficiently. These issues reduce convenience and affect the overall darshan experience.

Solution Phase

Darshan Ease provides a digital platform that allows devotees to book darshan tickets online, check real-time slot availability, make secure payments, and receive instant booking confirmations. The system also helps temple organizers and administrators efficiently manage temples, darshan slots, bookings, and user information, resulting in a faster, more organized, and hassle-free darshan experience.
